

Smoking Policy Implementation Strategy

Each college, in consultation with the health services coordinator (college nurse), will develop an educational program that provides smoking cessation information and other resources to help students, faculty, and staff to stop smoking. The programs will make use of various types of media such as websites, computer screen messages, print media, live presentations, and discussions. For example, at College of Alameda, a *No Smoking* message will appear as “wallpaper” on the computer screens in the student computer labs. The student associations will be involved in the implementation. Our college communities will assist in enforcement of the smoking policy.

PCCD General Services will provide the proper signage for the colleges’ entrances, as well as locations around the campuses indicating *No Smoking* at College of Alameda and Laney College and the designated locations for smoking at Merritt College.
